

# Super-Krete® Application Tools

TECHNICAL DATA SHEET

## Super-Krete S-16000 Flex Smoother™ DESCRIPTION

Flex Smoother is a fantastic tool designed to be used with Super-Krete's 1/8" Seamless Texture Overlay, 1/4" Wet-on-Wet Stamp Overlay and 1/4" Super-Stamp Single Component Stamp Overlay systems. This tool is used to smooth out the lines and grooves created in the overlays by the gauge rake prior to the stamping procedure. The user can do this while standing, eliminating the use of a trowel or stepping in wet material.

### USES

Textured Overlay System  
S-1050 1/8" Seamless Texture System  
S-1701 1/4" Wet-On-Wet Stamp System  
S-1801 1/4" Stamp Overlay System

### ADVANTAGES

Eliminates Kneeling  
Smooths Out Gauge Rake Lines  
Lightweight  
Easy to Use  
Work While Standing

## Super-Krete S-18000 Squeegee™ DESCRIPTION

S-18000 Squeegee is a lightweight tool specifically designed to be used with all of Super-Krete's squeegee resurfacing systems. When used properly, this tool will spread any Super-Krete material quickly and nearly effortlessly. The user can do this while standing, eliminating the use of a trowel or stepping in wet material. The Squeegee can be used one way for quick, 1/16" resurfacing, or turned around for spreading material in thicker applications. It is made of a rounded and flexible rubber for uniform finishing. This Squeegee's durable 60 durometer, extruded neoprene blade is clamped into the Squeegee base making an extremely durable tool that will last contractors for years. The 22° blade angle allows the rubber to work on its side instead of on its edge promoting mark free coating with no edge marks. Its radius edge blade eliminates the frustrating break in period normal to standard slit rubber blades, and provides a mark-free finish from the start. This Squeegee also has a heavier, stronger feel than most other standard squeegees. The weight of the Squeegee allows for an easier pull on the material so the applicator is not fighting the material as it is being applied. The clamp at the base of the squeegee allows the applicator to access hard to reach areas while maintaining strength and durability.

### USES

Textured Overlay Systems  
Filling Divots / Imperfections  
Great Surface Coverage

Broom Finish Overlays  
Resurfacing

### ADVANTAGES

Eliminates Kneeling  
Distributes Material Rapidly  
Lightweight

Work While Standing  
Easy to Use

## Super-Krete S-19000 Gauge Rake™ DESCRIPTION

Gauge Rake is a tool designed to be used with Super-Krete's 1/8" and 1/4" textured, stamp and broom finish resurfacing systems. This tool rapidly and efficiently spreads out Super-Krete overlay materials in an even thickness prior to the stamping or finishing procedures. The user can do this while standing, eliminating the use of a trowel and avoid stepping in wet material.

### USES

Textured Overlay Systems  
Texturing Systems  
Underlayment Systems  
Broom Finish Systems  
All Resurfacing Systems  
Floor Smoothing / Leveling

### ADVANTAGES

Eliminates Kneeling  
Work While Standing  
Spreads Material in an Even Thickness  
Easy to Use  
Lightweight
