*Colors shown are approximate. Colors will vary depending on substrate color and amount of material applied. A sample test is always recommended before beginning any project. The final color of the installed project may vary due to finishing techniques, job conditions and type of sealer used. Physical samples are always recommended to determine actual color and finishes. It is recommended that all surfaces be sealed with the appropriate sealer. Refer to the **Super-Krete Products Sealer Selection Guide** to determine the most appropriate sealer for your project. Training available. For professional use only.

DESCRIPTION & KEY BENEFITS

Super-Krete offers 16 Cem-Dye W colors ranging from rich earth tones to vivid. These fast and affordable interior liquid dyes are water and acetone soluble and can be used with Super-Krete S-4000 Acid Stain series or as a standalone coloring system.
